## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-91 are allowed.

The following is an examiner's statement of reasons for allowance: As the claimed invention was read in light of the specification, the prior art of record fails to disclose or render obvious a magnetic shunt assembly for an apparatus, the apparatus including an optical assembly, a gap near the optical assembly, a stage, and a mover assembly that moves the stage along an axis in the gap, the mover assembly generating a magnetic field, the magnetic shunt assembly comprising a first magnetic shunt positioned approximately between the optical assembly and the mover assembly, the first magnetic shunt being made of a magnetic permeable material, the first magnetic shunt providing a low magnetic reluctance path that redirects at least a portion of the magnetic field away from the gap.

The closest prior art, Kojima (722), Shamouilian et al. (358) or Fu. (576), teach the need for a magnetic shunt during sputtering and/or etching processes, not during exposure using an optical assembly and the mover assembly rotates that stages and does not move the stage along an axis.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
